

Core machines Z95

Shell cores

- for production of cores up to 30 kg

The Z95 Shell core machine is an ideal equipment for mass-producing a great variety of complex hollow sand cores with the coated sand core.

The machine includes the coated sand handling and collection system, an auto core picking and double sand blowing from top and bottom. Z95 may be supplied with electrical or gas heating system.

Technical characteristic of Shell core machine Z95

Model	Maximum shooting capacity, kg	Max. size of core box (LxHxW), mm	Electric power, kW
Z955B	12	500x500x150/150	15
Z956B	15	600x500x110/110	22
Z957B	25	700x700x180/180	24
Z958B	30	800x600x180/180	64
